

2 Los Gemelos

Description Performance

On this piece I'm describing the journey of two Bolivians Twins who are trying to find water for their Village. Bolivia does not have access to any ocean, sea or river, and find water is extremely difficult.

Vocals are created with a plug-in called MANIPULATOR and a vocoder, everything connected to my laptop. I also play piano, pads, cuatro (Venezuelan instrument) and some guitars, which I loop during the piece. A string Quartet plays during the song. One of my musicians plays the whole rhythm section and some "Drum Pads".
